RE: #TROP-D-19-01102R3

"Effects of additives in wet brewery residue silage on lamb carcass traits and meat quality"

Dear Dr. Panatuk,

The above-mentioned paper has been submitted for publication in Tropical Animal Health and Production.

To view the manuscript, please click here: <https://www.editorialmanager.com/trop/l.asp?i=286451&l=QI6RYE32>

I would appreciate your opinion as to its scientific merit, ethical acceptability and suitability for publication. It would be most helpful if you were to focus your comments on the experimental design, results, interpretation and discussion, giving grammatical and stylistic matters only secondary attention as "minor comments".

A good indication of the scientific value of a paper is to what extent, or whether or not, it is quoted by other authors. Given your experience in the subject area, I would also appreciate your opinion on the likelihood that authors will quote this paper.

The journal is attracting more and more submissions. Since we have a limited annual page budget, we have to be very selective. It would be a great help, if you think a paper generally acceptable, if you were to score the paper from one to five stars, where one star is acceptable but of low priority and five stars is an excellent paper very much worth publishing in TAH&P.

Please also indicate in your review any matters that you would not wish to be copied and forwarded to the author. If you consider that major revision is necessary, I would like to be able to return to you for further comment any revised text that we receive should I be in any doubt as to whether your criticisms have been met.

In case you accept to review this submission please click on this link:

<https://www.editorialmanager.com/trop/l.asp?i=286452&l=KSZBP2UC>

If you are willing to review but cannot do so immediately, please click the above URL to accept the invitation. You can then access the manuscript, via the online site, when it is convenient for you at:

Your username is: julakorn

If you forgot your password, you can click the 'Send Login Details' link on the EM Login page at <https://www.editorialmanager.com/trop/>.

In order to expedite the publication process I would be grateful if you might please let the journal know as soon as possible whether you are prepared to review the manuscript (accept) or not (decline). Reviewers are invited to return their reviews within 4 weeks of accepting a paper.

To decline this invitation, click here: <https://www.editorialmanager.com/trop/l.asp?i=286453&l=MYC8R3KM>

Finally, it would be useful if the website is as up-to-date as possible and that we have a note of reviewers' specialist areas. If it is convenient, could you please take this opportunity to check and update your details?

Thank you for your help in refereeing this paper for Tropical Animal Health and Production.

Yours sincerely,

Metha Wanapat, Ph.D., Post Doc.
Tropical Animal Health and Production

As a result of the significant disruption that is being caused by the COVID-19 pandemic we are very aware that many researchers will have difficulty in meeting the timelines associated with our peer review process during normal times. Please do let us know if you need additional time. Our systems will continue to remind you of the original timelines but we intend to be highly flexible at this time.

This letter contains confidential information, is for your own use, and should not be forwarded to third parties.

Recipients of this email are registered users within the Editorial Manager database for this journal. We will keep your information on file to use in the process of submitting, evaluating and publishing a manuscript. For more information on how we use your personal details please see our privacy policy at <https://www.springernature.com/production-privacy-policy>. If you no longer wish to receive messages from this journal or you have questions regarding database management, please contact the Publication Office at the link below.

In compliance with data protection regulations, you may request that we remove your personal registration details at any time. (Use the following URL: <https://www.editorialmanager.com/trop/login.asp?a=r>). Please contact the publication office if you have any questions.
