

# MOONSHOT THINKING

# THE MOONSHOT FACTORY

X is a diverse group of inventors and entrepreneurs who build and launch technologies that aim to improve the lives of millions, even billions, of people. Our goal: 10x impact on the world's most intractable problems, not just 10% improvement. We approach projects that have the aspiration and riskiness of research with the speed and ambition of a startup.

WE CREATE RADICAL NEW  
TECHNOLOGIES TO SOLVE  
SOME OF THE WORLD'S  
HARDEST PROBLEMS

# WE ARE INVENTORS, SCIENTISTS, ENGINEERS, AND ENTREPRENEURS WORKING TO MAKE 10X PROGRESS AGAINST THE WORLD'S TOUGHEST PROBLEMS

## WHAT WE DO

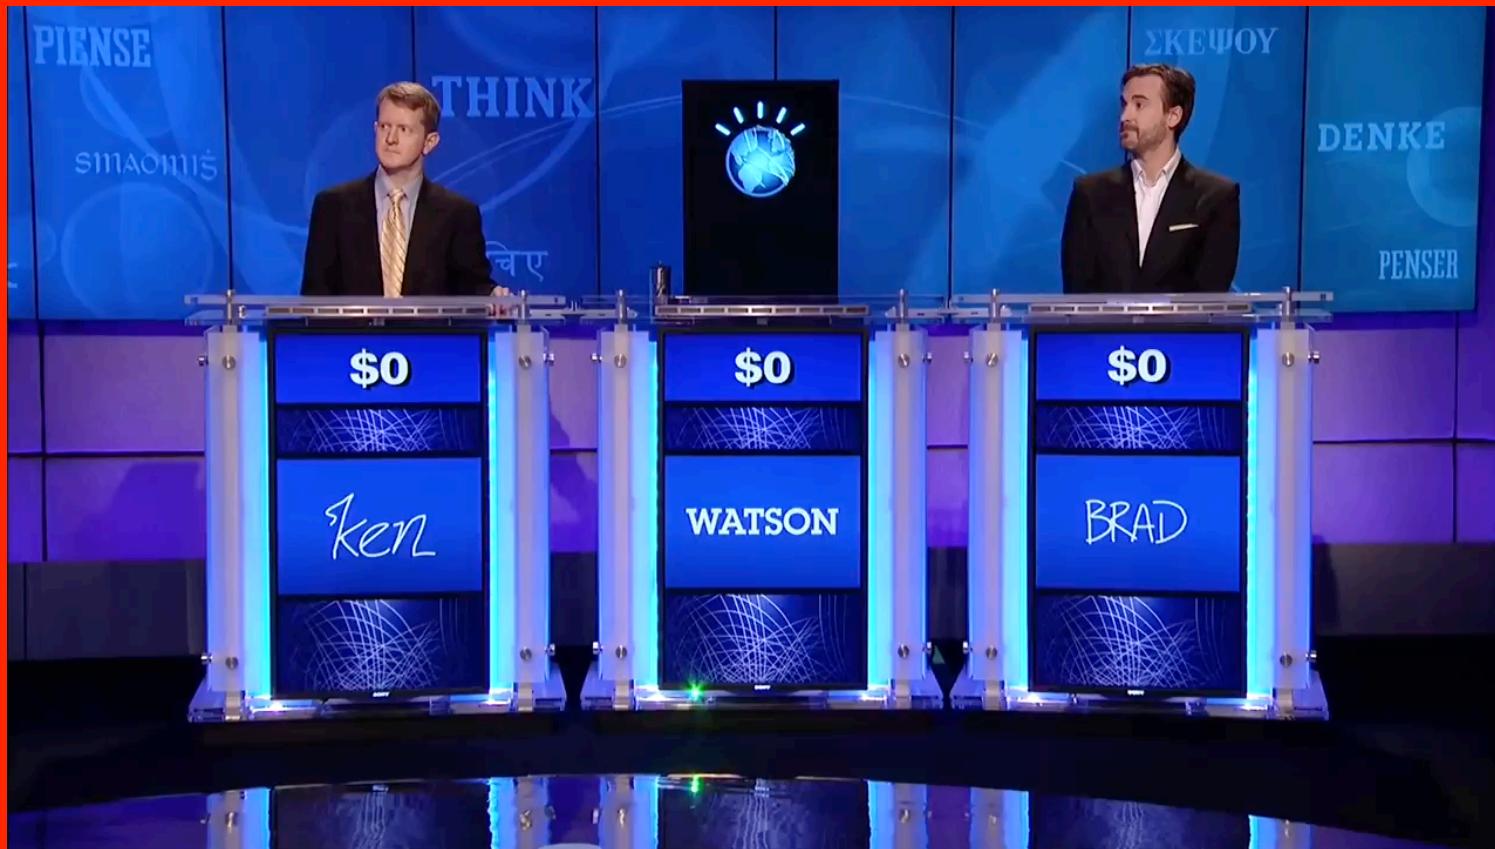

The world's biggest problems can't be solved with conventional, incremental thinking. At X, we've learned that breakthrough innovation happens when passionate teams of people have the audacity to challenge each other's perspectives and aim for the seemingly impossible.

**ASIMO (Advanced Step in Innovative Mobility) is a humanoid robot created by Honda in 2000.**

[ <https://www.bbc.co.uk/programmes/m0006x10> ]

# SIX KEYS TO MOONSHOT THINKING

1. Aim for 10x not 10%
2. Fall in love with the problem
3. Embrace learning
4. Make Contact with the real world
5. Build in diverse perspectives
6. Fight the tendency to build it perfectly

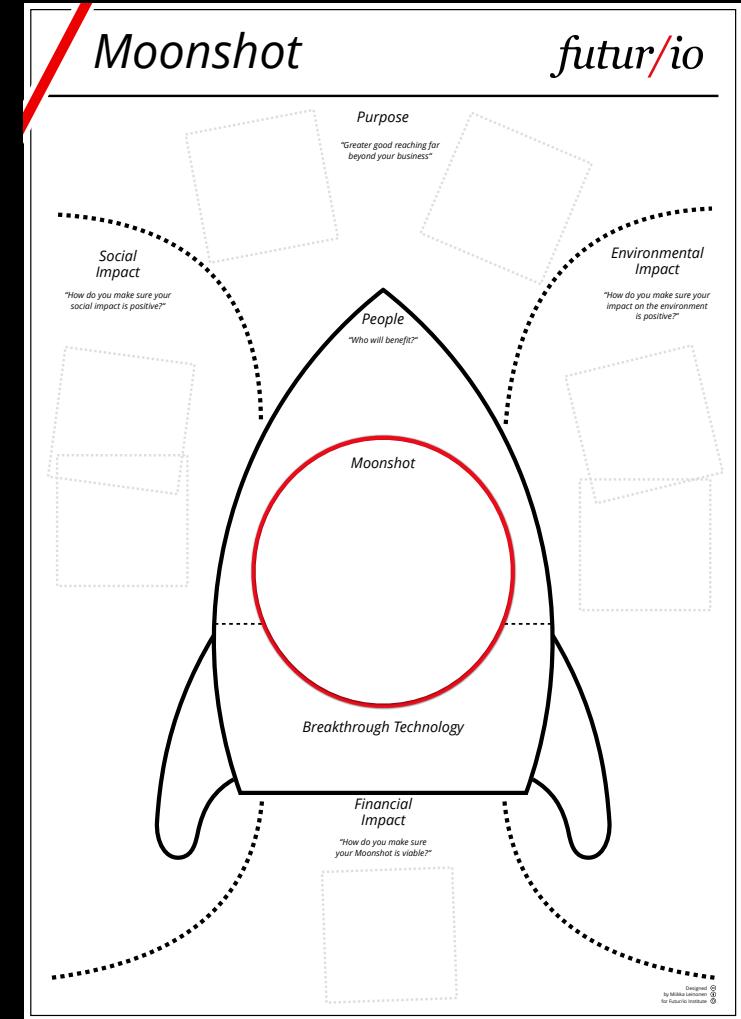

# MOONSHOT BLUEPRINT

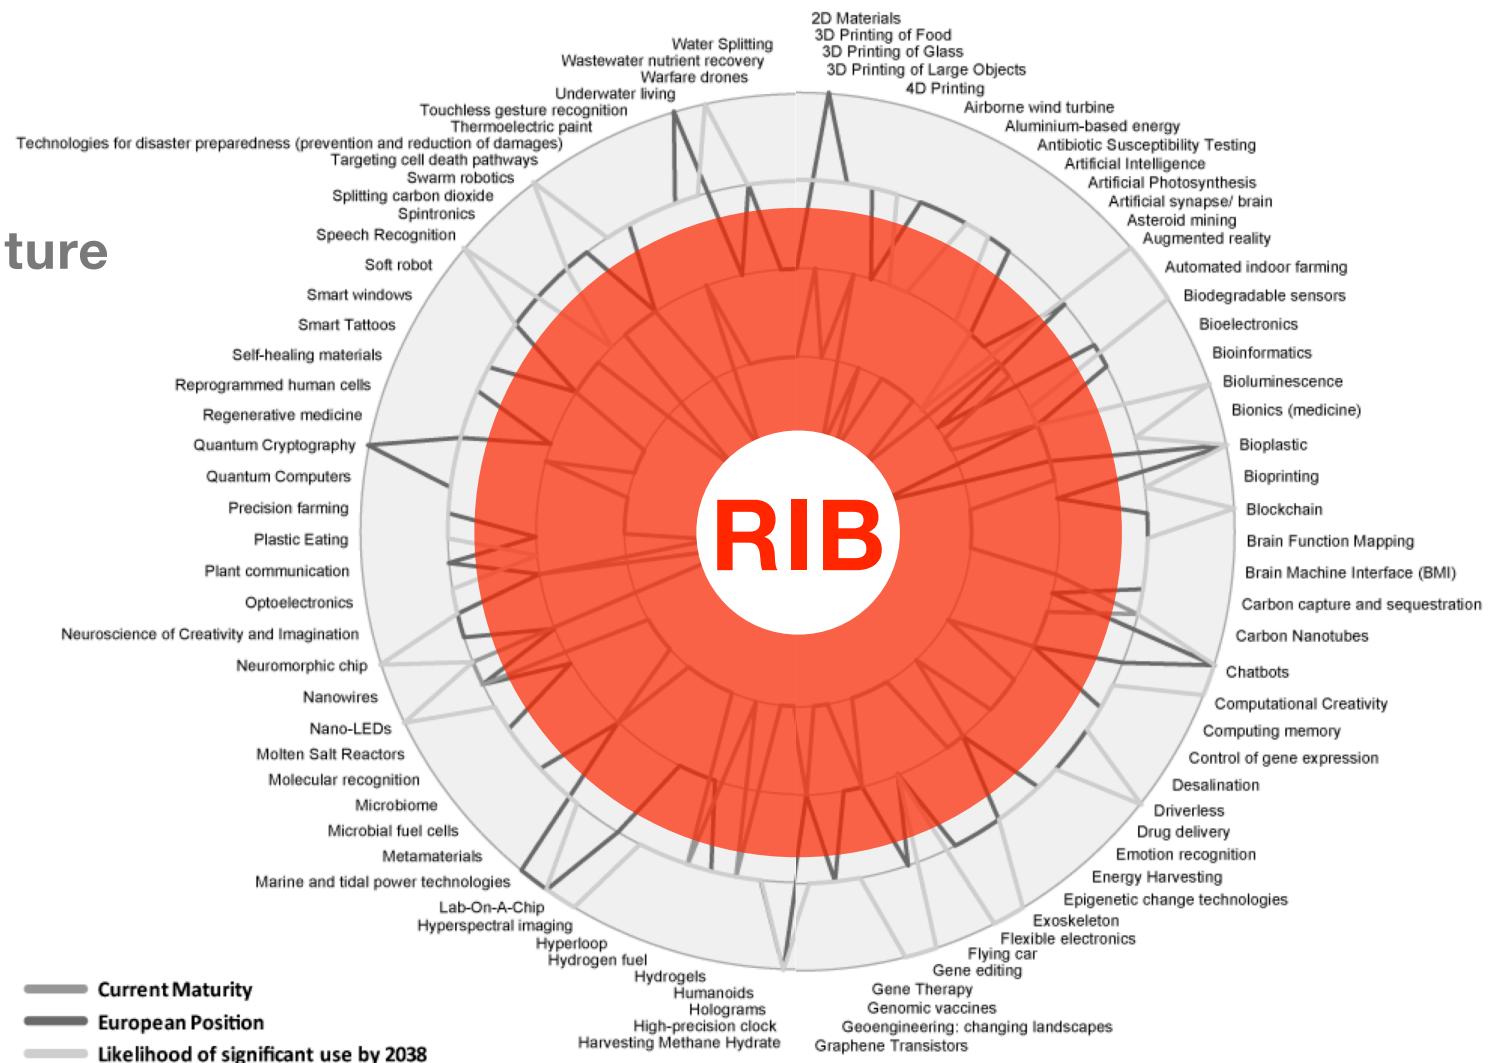

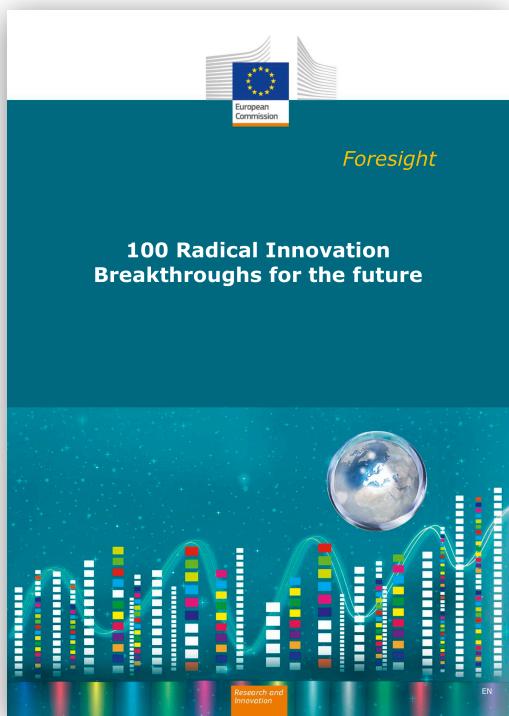

# WHAT IS YOUR MOONSHOT

A good Moonshot Idea can't be executed by tomorrow. The goal of a Moonshot is far beyond today's stage of development and it focuses to shape Desirable Futures that might only come to full fruition in a decade from now. A Moonshot seems daring, bold – maybe even impossible – but it has the pull of a mission that aims beyond our horizon and common understanding.
